HI-TEMP PIPELINE SPHERE

PIPELINE SPHERES FOR HI-TEMP APPLICATIONS

In response to the increasing demand for spheres for use in high temperature conditions, Maloney has developed a line of inflatable spheres for use with inline temperatures up to 325°F.

MALONEY HI-TEMP SPHERES OFFER THE SAME CHARACTERISTICS AS OUR NITRILE SPHERES, BUT HAVE IMPROVED ABRASION RESISTANCE. THEY ALSO HAVE GREATER RESISTANCE TO THE EFFECTS OF SOUR GAS THAN OUR OTHER SPHERE COMPOUNDS.

- For general pipeline service and batch separation.
- For refined products.
- For hot Asphalt.
- For Geothermal applications.
- Available in 80 Durometer Shore A hardness.
