

WHY YOU NEED SPECIALTY ELASTOMER GASKETS

Specialty Elastomer Gaskets were created for use in locations that are at a higher risk of exposure to chemical spills or are near water wells or pipelines. They resist deterioration from chemical exposure to avoid contaminants entering water pipelines through pipe joints.

Maloney Technical Products has expertise in the manufacturing of Specialty Elastomer Gaskets for water, wastewater and industrial applications.

Maloney has been making products, including gaskets, for over 75 years from a variety of elastomers, including:

- ✓ EPDM
- ✓ NBR (Nitrile®)
- ✓ Neoprene®
- ✓ FKM (Viton®)

Our gasket sizes are available in a size range from 2"-64".

Maloney Can Supply Your Specialty Elastomer Gasket Needs For:

- ✓ MJ Joints
- ✓ MJ Transition Gaskets
- ✓ Push-On Joints
- ✓ Full Face Flange (1/8" thick/three bulb type rings)
- ✓ Ring Flange (1/8" thick/three bulb type rings)

MALONEY PRODUCTS MEET OR EXCEED THE REQUIREMENTS OF THE APPROPRIATE STANDARDS:

- ✓ ANSI/AWWA C110/A21.10
- ✓ ANSI/AWWA C115/A21.15
- ✓ ANSI/AWWA C153/A21.53
- ✓ ANSI/AWWA C111/A21.11
- ✓ ASME/ANSI B16.1
- ✓ ASME/ANSI B16.5
